SUMMARY

Software developer specialized in building efficient, intuitive, and scalable web applications that meets client expectations. Experienced in implementing API endpoints for both mobile and web applications, and in developing role-based full-stack applications. Seeking to leverage my technical expertise in a dynamic work environment.

EDUCATION

09/2019 – 11/2023   **BSc. Computer Science**, UDS, Navrongo Campus

EXPERIENCE

09/2023 – 01/2024 || **BACKEND DEVELOPER - Sommalife LTD**

- Developed a unique farmer identification number generation algorithm making it possible for the system to support multiple agents within a district.
- Implemented endpoints for sales request confirmation. Assigned team members appropriate permissions, facilitating efficient processing of requests.
- Implemented endpoints for transferring data from mobile to web applications thereby streamlining the data synchronization process and achieving 100% data consistency across both platforms.

PROJECTS

SAVCOE Management Information System (MIS)
Role-based school management system for tertiary institutions.

- **Student Panel**: Developed a comprehensive interface for course registration, results access, and results download. Integrated a dashboard for displaying academic and fee status information for students.

- **Admin Panel**: Implemented administrative features for academic year and semester setups, course registration and fee schedules, with the ability to re-open registration periods in special cases.

Kolanoore E-commerce Platform
E-commerce application facilitating online sales for small businesses.

- **User Features**: Created an engaging landing page and product catalog, with options for product detail viewing and a payment gateway supporting mobile money and credit card payments.

- **Admin Panel**: Built an admin interface for managing products, orders, and customizing business details displayed on the user's interface.

Scholarship Application System
Platform for streamlining scholarship application processes with applicants, reviewers, and admin interfaces.

- **Applicant Interface**: Created a panel for users to submit scholarship applications for review.

- **Reviewer Interface**: Built a panel for reviewers to shortlist and manage scholarship applicants.

- **Admin Interface**: Enabled administrative control over reviewers, applicant tracking,

historical status review and export functionality.

TECHNICAL SKILLS

- Languages: PHP, Python, JavaScript, MySQL, HTML, CSS

- Soft Skills: Strong communication skills, great problem-solver, adaptable to dynamic environments.
